

NAME:

ADM:

CLASS:

1. You are provided with a solid K in a testtube. Use it to answer the questions that follow.

a) Add distilled to the solid and state the observation.
Observation. (1mk)

b) State the kind of change observed. (1mk)

c) State 3 characteristics of the change named in (b) above. (3mks)

i)

ii)

iii)

d) State 3 precautions to observe when doing the above experiment. (3mks)

i)

ii)

iii)

e) List 2 potential hazards which can be caused by

i) Solid K _____ (1mk)

ii) Test tube _____ (1mk)

2. You are provided with specimen M. Use it to answer the questions that follow.

a) Which part of a plant is specimen M. (1mk)

b) Draw and label external parts of Specimen M (4mks)

c) Name 2 internal parts of Specimen M. (2mks)

i)

ii)

d) How is Specimen M adapted to perform its function? (3mks)

i)

ii)

iii)

3. You are provided with a block of wood labelled Q.
Use it to answer the questions that follow.

a) Measure the following in SI units. (3mks)

a) Length _____

b) Width. _____

c) Height. _____

b) State the SI unit of force. (1mk)

c) Assuming the weight of the block of wood is 450N,
calculate the least pressure the block of wood can exert
on top of a table when placed on it. (3mks)

4. You are provided with Specimen M. Use it to
answer the questions that follow.

d) State 3 other basic quantities apart from length. (3mks)
